

Digital Health

Vision:

To emerge as a global leader in advancing digital health education, research, and innovation, fostering a digitally empowered healthcare ecosystem that enhances accessibility, efficiency, and equity in healthcare delivery across India and beyond.

Mission:

To revolutionize healthcare through interdisciplinary integration of digital technologies, education, and research by:

- **1. Empowering Healthcare Professionals:** Equipping students, practitioners, and policymakers with cutting-edge digital health competencies.
- **2. Driving Research & Innovation:** Catalyzing transformative research in areas like predictive modeling, telemedicine, and AI-driven healthcare solutions.
- **3. Bridging Policy and Practice:** Aligning academic initiatives with national priorities, including the Ayushman Bharat Digital Mission (ABDM), to create an interoperable digital health infrastructure.

Proposed Logo*

Core Values

- **Innovation:** Leverage emerging technologies to solve pressing healthcare challenges.
- **Collaboration:** Foster partnerships with government, industry, and academia.
- **Equity:** Ensure digital health solutions prioritize accessibility for marginalized communities.
- **Excellence:** Maintain rigor in education, research, and ethical standards.

Core Objectives

1. Education & Training
2. Research Excellence
3. Technology Integration
4. Policy Advocacy
5. Community Impact
